Sir:

In response to the Office Action mailed October 7, 2002, please amend  
the above-identified application as follows:

IN THE CLAIMS:

Please cancel claim 19.

Please amend the remaining claims as follows:

1. (Amended) A timer for controlling the activation of a load during  
repeating cycles, the timer including:
- a control unit having an internal timer;
  - a relay unit connected between the control unit and the load, wherein the  
control unit activates the relay unit to supply power to the load;
  - a time base dial coupled to the control unit, the time base dial movable  
between a plurality of discrete time base settings to set the duration of the repeating cycle
